Summary

Data Science graduate with a strong foundation in Java, Python, SQL, Data Structures and Algorithms, and full-stack web development. Experienced in building responsive web applications, designing relational databases, and integrating REST APIs. Seeking an entry-level Software Engineer role to develop scalable, high-quality software solutions.

Education

Bachelor of Technology in Data Science *2023 – 2026*
Rajeev Gandhi Memorial College of Engineering and Technology (RGMCET), Nandyal, Andhra Pradesh, India
CGPA: 8.01 / 10.0

Skills

Programming Languages: Java, SQL, Python

Core Java: Object-Oriented Programming (OOP), Exception Handling, Collections

Backend Development: Spring Boot, Microservices, REST APIs, JDBC

Databases: MySQL, SQL, Relational Database Design, Database Normalization

Web Development: HTML, CSS, JavaScript

Developer Tools: Git, GitHub, Eclipse IDE, VS Code, MySQL Workbench

Projects

E-Commerce Fashion Store *Java, JDBC, MySQL, JSP, Servlets*

- Developed a Java-based e-commerce web application implementing product browsing, user accounts, shopping cart, and order management.
- Implemented backend business logic using Core Java, JSP, Servlets, and JDBC for user authentication and application workflows.
- Designed and managed MySQL tables for users, products, carts, and orders using SQL queries and relational database concepts.
- Implemented CRUD operations for product and order management with database connectivity through JDBC.
- Deployed the application on Apache Tomcat and integrated the frontend with Java backend components for end-to-end functionality.

MediCore – Medical Dashboard Platform *REST APIs, JavaScript, HTML, CSS, SQLite*

- Developed a hospital appointment management system supporting patient, doctor, appointment, and review management.
- Integrated REST APIs for appointment booking, patient management, and healthcare data operations.
- Designed relational database tables and implemented SQL queries to manage patient, doctor, appointment, and review records.
- Implemented authentication and role-based access control for Admin and Patient modules.
- Applied CRUD operations, database normalization, and backend business logic to support healthcare application workflows.

Certifications

- **AWS Certified Cloud Practitioner** – Amazon Web Services (2025). Validated foundational knowledge of AWS cloud concepts, core services, security, pricing, and cloud architecture.
- **Python Certificate** – HackerRank (2025). Demonstrated proficiency in Python programming fundamentals and problem-solving.

Coding Activities

- Practice Data Structures and Algorithms regularly on LeetCode to strengthen problem-solving and programming skills.
- Participate in coding contests and programming challenges on LeetCode and GeeksforGeeks.
- Explore AI-assisted development tools to improve coding workflow and productivity.
